Factory Tour

Walk through Australia's largest air conditioning manufacturing facility and learn about the latest developments

Benefits to you:

- New knowledge and new connections with fellow consulting engineers, energy consultants, local government and commercial contractors in the HVAC industry
- Discuss with leading HVAC engineers existing challenges and customer requirements
- Ask direct questions to get answers for your customers and how to provide more value
- Gain a complete picture of new HVAC solutions to create valuable commercial propositions to give your business an edge
- Obtain Continuing Professional Development hours through AIRAH and Green Building Council of Australia for your participation
- Networking with like-minded industry attendees over a winery tour, dinner and refreshments
